**What is your identity?**

## Let's look at this week's story

Cambridge University has returned four spears to the descendants of an indigenous community in Australia, who crafted them. The four aboriginal spears are all that remain of the forty or so that British explorer, James Cook, and his team took from the Gweagal people more than 250 years ago. On their arrival in Australia in 1770, they became the first known Europeans to reach the country's east coast.

# This week's story looks at events related to ...

Read the information below, which explains some of the history behind the spears.

### Where did the spears come from?

The four wooden spears are considered very special by the Aboriginal clan, the Gweagals, who made them in the 18<sup>th</sup> century.

In 1770, the HMS Endeavour, a British ship with a crew led by Captain James Cook, landed in Australia. The crew were met by the Gweagal people. Following the less than friendly encounter, the British crew took forty of their spears. The boat then returned to England and four of the spears were given to Cambridge University.

After been displayed at the university's Museum of Archaeology and Anthropology for over 100 years, the spears were handed back at a ceremony with members of the Aboriginal community in attendance.

They are an important connection to our past, our traditions, and cultural practices, and to our ancestors.

Noeleen Timbery, from the La Perouse Local Aboriginal Land Council speaking about the four spears.

**Picture:** The Endeavour, the ship on the right, sailed for several years around the South Pacific before landing in eastern Australia in 1770. **Source:** Science Photo Library.

**Do you think it's important that they returned to Australia?**

Look at the resource below, which shares some children's ideas of things that are special to them.

I keep this family photo in my diary. My auntie died last year so this photo is special to me because I can look at her when I'm missing her.

The woods near my house are special to me because my family do a spring walk here every year. I like to see the new flowers growing and it is nice to spend time outside with my brother and sisters.

Hanukkah is a special time for me because I get to spend time with all my family. When I see my mum putting out our menorah, I feel excited because I know that we will soon be celebrating Hanukkah.

This is my special rocking chair. It belonged to my grandad when he was little. I like to sit in it and my dad reads stories to me, like my grandad used to with him.

**Do you have any similar things that are special to you?**

Look at the resource below, which shares information about some artefacts being returned to their homes.

In 2023, Australia returned three historical artefacts to Beijing. A dinosaur fossil that is more than 100 million years old and two Tang Dynasty figurines that were smuggled out of China to other countries before arriving in Australia. The fossil was taken in 2020 and the Tang Dynasty items the following year. A dynasty is the time one family reigned. The Tang Dynasty ruled China over 1000 years ago for almost 300 years. The Tang Dynasty has been described as a golden age for Chinese arts and culture.

**Left: Tang Dynasty Golden Pavilion in Chi Lin Nunnery, Hong Kong.**

In 2021, 17,000 archaeological relics were sent back to Iraq from the United States. Cornell University in Ithaca, New York, had roughly one-third of the looted artefacts, which included clay cuneiform tablets containing etchings of an ancient Middle Eastern script.

**Below: A cuneiform tablet from the ancient Middle East.**

In 2024, 150 years after objects were taken from what is now known as Ghana, the UK returned them. The Victoria and Albert Museum lent 17 pieces, and 15 of the gold and silver items were from the British Museum. They were stolen from the court of the Asante king during 19th-century conflicts between the British and Asante people. The loan will last for three years but may be extended for a further three.

**What is your identity?**

# Reflection

Who you are today is a result of many things, including your family and friends, experiences, places you've lived, and things that matter to you. For some, artefacts or objects will play a key role in their identity.

## **Mutual Respect and Tolerance**

Every family or community has its own history, which can help to shape each individual member. When we understand and embrace this, we can treat everyone with empathy and respect.

# Protected Characteristics

Our identity is made up of many things, including our culture, traditions and heritage. By listening openly, we can learn about things that make each one of us special and unique.

# UN Rights of a Child

Governments must ensure that children can learn the language, culture and religion of their family, especially if these are different from those of most of the other people living in that country.

# Useful vocabulary

## Aboriginal

Relating to the earliest known inhabitants of a region.

The four **aboriginal** spears are all that remain of the forty or so that British explorer, James Cook, and his team took from the Gweagal people.

## Ancestors

The people from whom we have descended, who lived a long time ago.

'They are an important connection to our past, our traditions, and cultural practices, and to our **ancestors**.'

## Clan

A group of people related by blood, marriage or common interest.

The four wooden spears are considered very special by the Aboriginal **clan**, the Gweagals.

## Encounter

An unexpected meeting.

Following the less than friendly **encounter**, the British crew took forty of their spears.

## Heirloom

A special object that has been in a family for a long time and is passed down from generation to generation.

Do you know what an **heirloom** is?

## Indigenous

Having always lived in a place.

Cambridge University has returned four spears to the descendants of an **indigenous** community in Australia.

**Can you use them in your writing this week?**

## Sahara Skies in Greece

Cities and towns across much of mainland Greece were recently blanketed in an orange haze, which had many people wondering what was happening! One onlooker in Athens commented that the unusual sky 'created an eerie image that made Athens look like a colony on Mars...'! The effect was created by dust that travelled from the Sahara Desert in North Africa. The desert releases up to 200 million tonnes of dust every year. The heavier dust particles quickly fall back to Earth, but the lighter dust can be blown as far as northern Europe, so

**Pictured:** Views of the orange sky in Greece.  
**Source:** @zefhkyprianou on X.

instances such as this do sometimes happen. While many enjoyed the slightly spooky spectacle, those with any breathing difficulties were advised to limit exercise and wear a protective mask when outdoors. Luckily, the dust clouds have now cleared, and the beautiful blue skies of Greece have returned.

## Clawesome Comedy!

Feeling a little crabby? Well, look no further! The Crab Museum in Margate recently held a contest to find the funniest crab-related jokes. And who better to judge these crabulous jokes than a crew of crabs! A panel of judges shortlisted their favourite jokes. These jokes were then written on pieces of paper and waterproofed before being lowered into the sea using string. The winning joke was then sea-lected by a crab. The quality of jokes was astounding, with the museum saying, 'We've been pinching

ourselves since submissions closed!' Some of the contenders included pearls such as 'Why did the crab cross the road? It didn't. It used the sidewalk' and 'How do barnacles get around? By taxi crab'. But first place was pinched by Leon Price with his joke, 'Man walks into a restaurant with a crab under his arm and says 'do you make crab cakes'? Manager answers 'yes, we do'. 'Good' says the man. 'because it's his birthday'.

### How can shops make sure everyone feels represented?

*I think this is quite tricky for shops. Maybe shops should do a questionnaire to ask all the customers if they are happy with their shop. Hannah*

## Looking for Lego

A 13-year-old, in Cornwall, has devoted a lot of his spare time to collecting nearly 800 pieces of Lego lost from a container during a large storm in the 1990's. He has now found his most coveted piece! Liutauras Cemolonskas searched for over two years to find the super rare Lego Octopus! The Great Lego Spill of 1997, on the shores of the ancient Cornish market town of Marazion, occurred when 62 shipping containers were lost into the sea from a cargo ship due to terrible weather. One of these containers spilled a massive shipment of five million pieces of Lego into the water. Most were sea-themed, and some examples of pieces that washed away, including the sought-after Lego octopus, are pictured above. Lost in the waves were 352,000 pairs of flippers, 97,500 scuba tanks, and 92,400 swords. The Lego octopuses are the hardest to find as there were only 4,200 onboard. The group 'Lego Lost At Sea' are collating information about where the lost

**Pictured:** Examples of the Lego pieces from the shipment lost at sea.

**Source:** Lego Lost At Sea Facebook page.

pieces are when they wash up on shore. They record the locations on a map. Unbelievably, almost two days later, another Lego octopus was discovered just 10 miles further down the coast! Justin Goode, who had been taking his friend's dog for a walk when he made the discovery, said, 'Within a few steps of feet on sand I spotted the octopus, right at the end of a long seaweed strand line left by this morning's high tide.'

**Do you think you would enjoy looking for Lego on this coastline?**

**What else do you think you might find?**

## Europe's Clean Electricity

Energy think tank, Ember, has announced that a record 60% of Europe's electricity was powered by clean energy sources in the first two months of this year! January and February of 2024 saw a record-breaking amount of clean electricity generation in Europe, equating to 516.5 terawatt hours - 12% more than the same period of time last year. This is said to be possible due to the fact that more electricity is coming from hydro, solar, nuclear and wind generation consistently every year. There was also a marked decrease in the amount of fossil fuel-powered electricity production, down to just 351 terawatt hours. This is the lowest it has been since 2015 and 8% less than last year. The two fastest growing sources for clean energy electricity across Europe were nuclear and hydropower. Clean

energy is described as energy that comes from resources that never run out and whose byproducts have minimal, or no, effect on the environment. Some countries, including Ireland and Portugal, were able to say that they had days or multiple days when they were using only renewable energy for two thirds of their whole population.

**Have you ever seen windmills or a hydro dam harvesting energy?**

**What do you think about them?**

**Pictured:** A windmill farm in the Netherlands.
