

## What should I already know?

- How to print with simple objects dipped in paint to create patterns

## What will I know by the end of the unit?

- Printing means to transfer an image from one surface to another, which can be repeated.
- Fabrics such as curtains, quilt covers, clothing often use a printing process to create the pattern or design;
- Block (or relief) printing means to use a carved material to transfer the ink/paint onto the desired surface.
- Know that many colours can be used in printing; through overlapping to create new colours or through layering;
- Katusushika Hokusai, Elizabeth Catlett and Eric Gaskell all use(d) block printing to create art.

## Vocabulary

Block	The object on which the print design is created
Design	The image to be printed
Template	The image made on the block to be printed
Transfer	Where paint or ink are printed onto a surface of another object
Indent	Where a soft surface has a design pressed into it

## What skills will I have developed?

- Drawing skills – needed to create a simple design;
- Rolling skills – needed to roll the paint/ink onto the 'block'
- Carving skills – needed to carve the design onto the polystyrene tile (without cutting through completely) How to mix red and yellow together to make orange.
